Celebrate Trees!

Trees give us oxygen, shade, provide habitat for wildlife, fruit for food, timber for construction and wind protection. There are so many other reasons to love trees. Do you have a favorite tree?

Discover where the oldest living tree is located:
<https://wonderopolis.org/wonder/What-Is-the-Oldest-Living->

Supplies:

egg carton
toilet paper roll
2 recycled CD's
crayons or paint

masking tape and clear tape
glue stick, white glue (hot glue/optional)
scissors
tissue paper (optional)

Cut egg carton as shown.

Fold carton and using masking tape start taping it closed leaving top and bottom open. I made two different trunks.

Tape trunk to CD.

Trim edges and tape the the whole CD.

Ready to paint or color.

Use 3 pieces of paper for tree top.

The main tree uses one piece of paper. Tape CD and glue as shown.

Cut out your tree shape.

Prepare your two other pieces of paper by gluing in half. Draw two tree shapes on each paper and cut them out. Now cut 4 pieces from your toilet paper roll and tape to your main tree piece. (2 on each side)

This is a top view of how your tree will look. If you want to add tissue paper just put in the circles. I didn't have to tape at all!

HAVE FUN!
